SECRET
INTRODUCTION

This publication contains the geographic location plots of the photography on Mission EX6447, dated 20 January 1968. These plots are presented on a WAC format that has been reduced for convenience to approximately 60 percent of the original size. The line joining the plotted frames represents the trace of the principal photo of the photography and does not necessarily represent the vehicle nadir (position of the vehicle in relation to the terrain). There are 8 plot sheets in this publication arranged in ascending order by control number.

The flight-line Index on page III indicates the approximate track of the vehicle for that portion of the mission during which the camera was in operation.
